Questions – Part 1

- Create a Database and name the database as Company

- Create a new Table and name the table as Inventory

- Your new Table has following fields:
  - ItemID (Primary Key : autonumber)
  - Item_Name (Text)
  - Stock (Number)
  - Price (Number)

Questions – Part 2

- Now enter the records in your table as given below:

ItemID	Item_Name	Stock	Price
1	Book	28	44
2	Pen	34	5
3	Pencil	89	4.5
4	Paper	5000	0.5

Questions – Part 3

♦ Now use Forms to fill these two records

ItemID	Item_Namne	Stock	Price
5	Colors	78	20
6	Eraser	50	3

Questions – Part 4

- Simple_Query: Now create a simple query to display Item_Name and Price

- Condition_Query: Create a new query using query design to display all the information about an item if the price is less than 10

- Generate a report for the above query
